Dear Sir or Madam,

I am writing to express my interest in the User Experience Design internship at Assist Digital, as advertised on your website. I am a 3rd year Communication & Multimedia Design student at NHL Stenden University of Applied Sciences, Leeuwarden, specializing in user-centered design, with hands-on experience in research, prototyping, and UI/UX workflows.

During my studies, I have worked on real-life projects in collaboration with designers, researchers, developers, and stakeholders. Through this, I have gained experience working in multidisciplinary teams and developed strong skills in both design and research, as well as in team collaboration. I am comfortable working with Figma and other design-focused software such as Illustrator and Photoshop. During my exchange minor in Ireland, I also gained basic knowledge of both front-end and back-end development, which strengthened my creative thinking and problem-solving skills.

What draws me to Assist Digital is the way you create digital experiences that make a real impact. I appreciate that your work goes beyond visual design alone and focuses on building well-thought-out digital products. I find it inspiring how design, development, and data work closely together in your projects and how user needs and business goals are both taken seriously.

I am confident that joining Assist Digital as an intern would give me the opportunity to grow as a designer, learn from experienced professionals, and contribute to projects for real clients. I am very enthusiastic about the possibility of working within your creative environment.

I would appreciate the opportunity to meet with you to further discuss my application and I look forward to hearing from you.

Yours sincerely,
Isabel Fotache
